- We care about our local communities and support our staff to get involved.
- We will invest in your personal development to help you succeed.

The Role

Working at Flow Technology you will be part of the Manufacturing Team working closely with the Process Engineering Team that is responsible for the design and fabrication of complex process equipment/systems. To support the company's growth, we are looking to appoint a Manufacturing Engineer/Technician to coordinate all fabrication and supply chain activities in the company's manufacturing workshop in Charleville.

Key Responsibilities

- Responsible for successful coordination of fabrication phase of process skid projects on time and on budget.
- Attends regular Customer meetings with the Engineering Team.
- Preparation and weekly reporting of project-related schedules and budgets (fitter hours).
- Working with Workshop Foreman to plan week-to-week fitter workload to maximise fitter efficiency.
- Proactive coordination with Engineering Team to ensure timing provision of quality information and drawings.
- Planning, and hands-on management of Sub-Contractors to ensure work is completed on time and to the highest quality.
- Planning, management and expediting of suppliers to ensure equipment is delivered to the workshop on time.
- Conduct PID and GA Walk Downs and tack inspection of systems.
- Coordinate Pre-FAT and FAT activities with the Engineering Team.

- Coordinate the Turnover Packages (TOPs) for manufacturing/fabrication, completion, testing stages.
- Ensure accurate and complete manufacturing KPIS (fitter hours, deliver schedules, costs)
- Ensure that all health, safety, quality and environmental requirements are fulfilled
- Execute other tasks as assigned

Experience Requirements & Qualifications & Personal Attributes

The Candidate must have the following:

- 5+ years' experience in a similar capacity in a regulated industry. Experience in the Pharmaceutical industry and mechanical fabrication/assembly an advantage.
- Engineering or manufacturing or quality diploma/degree or mechanical trade qualification preferable.
- Experience of working with a mechanical contracting, mechanical equipment, fabrication an advantage.
- Ability to work on own initiative.
- Strong team member with the ability to identify and drive implementation of innovative quality improvements.
- Ability to work within project teams, consistently meeting deadlines and ensuring that all actions are being addressed appropriately.
- Demonstrate and actively promote high levels of professional quality engineering.
- Good communication skills. Must have the ability to communicate effectively at all levels of the company.
- Good administrative/organisational ability with high level of attention to detail.
- Ability to liaise with suppliers, customers, and regulatory contacts in an informed professional manner.

The Package

This is an exciting opportunity for a high calibre candidate join a successful company.

- Competitive salary with scope for progression.
- Annual performance related bonus.
- Company pension scheme.
- Life and PHI insurance.
- Hybrid working and flexible hours.
- Support for education, training and self-development.
