

# Temperature Control Units (TCUs)

Flow Technology has over 40 years of expertise in the design and build of heat transfer systems. Our references for Temperature Control systems, which have been delivered to the highest quality to meet customer needs, include systems for both small molecule API and biopharmaceutical projects, including projects in ATEX zoned areas. All systems are custom designed and built in-house by our expert Process Engineering and Craft team:

## TCU Experience:

- Fill Finish TCUs
- Filter Dryer TCUs
- Thermal Jacket Heating TCUs
- HPHW Heating & Cooling Skids
- HTST (High Temperature Short Time) Skids
- Harvest Product Heaters
