Working At Flow Technology

Working at Flow Technology you will be part of our Graduate Mentorship program in the process engineering team that is responsible for the design, fabrication and installation of complex process equipment/systems that are used to make everything from biotechnology medicine, dairy products, to beverage and drinks.

One of the key reasons why graduate engineers join our company is because you will get the opportunity to see your designs come to life in our workshop where you will work hand in hand with our excellent craftsmen, and then finally see it installed and operating in the final manufacturing site.

Very early in your career you will be given design, procurement and management responsibility with a high level of customer interaction. We are looking for people that are interested in taking on responsibility at an early stage in their career.

Why Join Flow Technology

There are a number of great reasons to join the Flow Technology team:

- You will be joining a growing company with a lot of ambition
- You will work with world industry leaders in the biotech, beverage and dairy sectors
- We encourage and give our staff genuine responsibility
- We offer competitive packages that match most blue-chip companies
- We provide flexible work hours to help you balance work and home life
- We care about our local communities and support our staff to get involved
- We will invest in your personal development to help you succeed

The Package

This is an exciting opportunity for a high calibre candidate to join a successful company.

- Graduate Mentorship Program.
- Competitive salary with scope for progression.
- Annual performance related bonus.
- Company pension scheme.
- Life and PHI insurance.
- Blended working.
- Support for training, self-development and chartership fees.
